SUMMARY

6+ years building software. I have led development teams in the Mexico City Government, built high-impact platforms —such as the city's free WiFi map, a Guinness World Record— and now run the technology area of the Ministry of Economic Development, backed by AI agents whose code I review line by line.

WORK EXPERIENCE

Secretaría de Desarrollo Económico de la CDMX

2026 – Present

Technology Advisor to the Secretary and Head of the Technology Department

I advise the Secretary and the whole staff on technology decisions, and I build the internal tools that make the work faster and better.

- **Public Markets Map.** Mexico City's 340 public markets on one map: where they are, what shape they are in, what they need, and which ones get attention first.

Agencia Digital de Innovación Pública

2025 – 2026

Technical Leader in Programming Teams

Led development teams in implementing innovative technological solutions.

- **GEEdims.** The platform any Mexico City government agency uses to put its procedure online — electronic signature included, no code written.
- **Internet for All.** The map of Mexico City's free WiFi: 35,350 hotspots and 1,270,550 people online at once.

Microsoft Learn

2021 – 2024

Microsoft Learn Student Ambassador

Official Microsoft student ambassador, promoting Microsoft technologies in the academic community.

- **ITIZ in Roblox.** I rebuilt my entire university in Roblox for the students who'd spent three years unable to set foot in it.

Whools?

2020 – Present

Founder

A community of developers I founded and still work on.

PERSONAL PROJECTS

- **ThreeCraft.js.** Minecraft built from scratch in Three.js, no engine.
- **SPACE ACADEMY.** The solar system at real scale in VR, with an AI answering your questions while you stand on Mars.
- **REHABILITATION MINI-GAMES.** Mini-games for the rehabilitation of Parkinson's patients.

SKILLS

AI	Claude Code, Claude API, Agents and MCP, Local models
Frontend	React, React Native, Tailwind CSS, Three.js, Figma
Backend	FastAPI, Django, Node.js, Docker, Linux
Software	C#, Python, Java, Flutter
Databases	PostgreSQL, MariaDB, MongoDB
Games	Unity, Blender, Game Design, C#

EDUCATION

Computer Systems Engineering

Graduated

Master's in Software Engineering

In progress

Computer Support and Maintenance

Certified
